

AMENDED IN SENATE JUNE 24, 2009

AMENDED IN SENATE MAY 13, 2009

CALIFORNIA LEGISLATURE—2009–10 REGULAR SESSION

ASSEMBLY BILL

No. 248

Introduced by Assembly Member Bonnie Lowenthal

February 10, 2009

An act to amend Section 71205 of, and to amend the heading of Division 36 (commencing with Section 71200) of, the Public Resources Code, relating to ballast water management.

LEGISLATIVE COUNSEL'S DIGEST

AB 248, as amended, Bonnie Lowenthal. Public resources: ballast water management.

(1) The Marine Invasive Species Act generally applies to all vessels carrying or capable of carrying ballast water into the coastal waters of the state after operating outside of the coastal waters of the state and to all ballast water and associated sediments taken on a vessel. The act requires the master, owner, operator, agent, or person in charge of a vessel that visits a California port or place of call to maintain specified information and records related to the vessel and ballast water management, and to make available or provide the information to the State Lands Commission. A person who, knowingly and with intent to deceive, falsifies a ballast water control report form required by the act is guilty of a misdemeanor.

This bill would require the master, owner, operator, agent, or person in charge of a vessel carrying or capable of carrying ballast water that has a ballast water treatment system installed on board the vessel that is used to comply with the act to maintain on board the vessel, in written

or electronic form, specified records that include material data safety sheets for certain chemicals, specified technical guides and publications, documentation that the ballast water treatment system meets certain environmental regulations, and a ballast water treatment log. The bill also would require the master, owner, operator, agent, or person in charge of one of those vessels that has discharged ballast ~~at a California port or place of call~~ *in waters of the state* to provide to the commission, upon the vessel's departure from ~~that~~ *the* port or place of call, the manufacturer and product name of the ballast water treatment system on board the vessel, the name of the organization that has approved the system, if applicable, the approval or certification number of the system technology, if applicable, the number of tanks and the volume of each tank that is managed using the system *and that was discharged in waters of the state*, and any additional information required by the commission by rule or regulation. The bill would require the master, owner, operator, agent, or person in charge of the vessel to provide that information on a form developed by the commission. Because a knowing and intentionally deceitful falsification of a report form required by the bill would be a crime, the bill would impose a state-mandated local program. The bill also would require the master, owner, operator, agent, or person in charge of a vessel subject to the act to maintain records of any additional information required by the commission by rule or regulation.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Vote: majority. Appropriation: no. Fiscal committee: yes.
State-mandated local program: yes.

The people of the State of California do enact as follows:

1 SECTION 1. The heading of Division 36 (commencing with
2 Section 71200) of the Public Resources Code is amended to read:

3

4 DIVISION 36. MARINE INVASIVE SPECIES ACT

5

6 SEC. 2. Section 71205 of the Public Resources Code is
7 amended to read:

1 71205. (a) (1) The master, owner, operator, agent, or person
2 in charge of a vessel carrying, or capable of carrying, ballast water,
3 that visits a California port or place, shall provide the information
4 described in subdivision (c) in electronic or written form to the
5 commission upon the vessel's departure from each port or place
6 of call in California.

7 (2) The information described in subdivision (c) shall be
8 submitted using a form developed by the United States Coast
9 Guard.

10 (b) If the information submitted in accordance with this section
11 changes, an amended form shall be submitted to the commission
12 upon the vessel's departure from each port or place of call in
13 California.

14 (c) (1) The master, owner, operator, or person in charge of the
15 vessel shall maintain on board the vessel, in written or electronic
16 form, records that include all of the following information:

17 (A) Vessel information, including all of the following:

18 (i) Name.

19 (ii) International Maritime Organization number or official
20 number if the International Maritime Organization number has not
21 been assigned.

22 (iii) Vessel type.

23 (iv) Owner or operator.

24 (v) Gross tonnage.

25 (vi) Call sign.

26 (vii) Port of registry.

27 (B) Voyage information, including the date and port of arrival,
28 vessel agent, last port and country of call, and next port and country
29 of call.

30 (C) Ballast water information, including the total ballast water
31 capacity, total volume of ballast water on board, total number of
32 ballast water tanks, capacity of each ballast water tank, and total
33 number of ballast water tanks in ballast, using measurements in
34 metric tons (MT) and cubic meters (m³).

35 (D) Ballast water management information, including all of the
36 following:

37 (i) The total number of ballast tanks or holds, the contents of
38 which are to be discharged into the waters of the state or to a
39 reception facility.

1 (ii) If an alternative ballast water management method is used,
2 the number of tanks that were managed using an alternative
3 method, as well as the type of method used.

4 (iii) Whether the vessel has a ballast water management plan
5 and International Maritime Organization guidelines on board, and
6 whether the ballast water management plan is used.

7 (iv) Whether the master, operator, or person in charge of the
8 vessel has claimed a safety exemption pursuant to paragraph (1)
9 of subdivision (b) of Section 71203 for the vessel voyage, and the
10 reason for asserting the applicability of that paragraph.

11 (E) Information on ballast water tanks, the contents of which
12 are to be discharged into the waters of the state or to a reception
13 facility, including all of the following:

14 (i) The origin of ballast water, including the date and location
15 of intake, volume, and temperature. If a tank has been exchanged,
16 the identity of the loading port of the ballast water that was
17 discharged during the exchange.

18 (ii) The date, location, volume, method, thoroughness measured
19 by percentage exchanged if exchange is conducted, and sea height
20 at time of exchange if exchange is conducted, of ballast water
21 exchanged or otherwise managed.

22 (iii) The expected date, location, volume, and salinity of ballast
23 water to be discharged into the waters of the state or a reception
24 facility.

25 (F) Discharge of sediment and, if sediment is to be discharged
26 within the state, the location of the facility where the disposal will
27 take place.

28 (G) Certification of accurate information, that shall include the
29 printed name, title, and signature of the master, owner, operator,
30 person in charge, or responsible officer attesting to the accuracy
31 of the information provided and certifying compliance with the
32 requirements of this division.

33 (H) Changes to previously submitted information.

34 (2) The master, owner, operator, or person in charge of a vessel
35 subject to this subdivision shall retain a signed copy of the
36 information described in this subdivision on board the vessel for
37 two years.

38 (d) The master, owner, operator, or person in charge of a vessel
39 subject to this division shall retain for two years a separate ballast
40 water log outlining ballast water management activities for each

1 ballast water tank on board the vessel and shall make the separate
2 ballast water log available to the commission for inspection and
3 review.

4 (e) (1) The master, owner, operator, agent, or person in charge
5 of a vessel subject to this division shall provide the information
6 described in subdivision (f) in electronic or written form to the
7 commission annually upon request of the commission. The master,
8 owner, operator, agent, or person in charge of the vessel shall
9 submit that information within 60 days of receiving a written or
10 electronic request from the commission. For purposes of this
11 paragraph, the reporting shall begin on January 1, 2008, and
12 continue until the date that the regulations described in Section
13 71204.6 are adopted.

14 (2) (A) The information described in subdivision (f) shall be
15 submitted using a form developed by the commission.

16 (B) The master, owner, operator, or person in charge of a vessel
17 subject to this subdivision shall retain a copy of the form submitted
18 pursuant to this subdivision on board the vessel for two years.

19 (f) The master, owner, operator, agent, or person in charge of
20 a vessel subject to this division shall maintain, in written or
21 electronic form, records that include the following information:

22 (1) (A) Date and location of drydocking events.

23 (B) Whether the vessel in general, and the submerged portion
24 of the vessel, sea chests, anchors, and associated chains in
25 particular, were cleaned during a drydocking event.

26 (2) Date and geographic location of all inwater cleaning of the
27 submerged portion of the vessel.

28 (3) (A) Date and geographic location of all antifouling paint
29 applications to the vessel.

30 (B) The manufacturer and brand name of the antifouling paint
31 applied to the vessel.

32 (4) Any additional information required by the commission by
33 rule or regulation.

34 (g) (1) The master, owner, operator, agent, or person in charge
35 of a vessel subject to this division that has a ballast water treatment
36 system installed on board that is used to comply with this division
37 and has discharged ballast ~~at a California port or place of call in~~
38 *waters of the state* shall provide to the commission the following
39 ~~information~~ *information, in electronic or written form*, upon the
40 vessel's departure from ~~that the~~ California port or place of call:

1 (A) The manufacturer and product name of the ballast water
2 treatment system on board the vessel.

3 (B) If applicable, the name and organization that has approved
4 the ballast water treatment system and the approval or certification
5 number of the ballast water treatment system technology.

6 (C) The number of tanks and the volume of each tank that is
7 managed using the ballast water treatment system *and that was*
8 *discharged in waters of the state.*

9 (D) Any additional information required by the commission by
10 rule or regulation.

11 (2) The information required by paragraph (1) shall be provided
12 on a form developed by the commission.

13 (h) The master, owner, operator, agent, or person in charge of
14 a vessel subject to this division that has a ballast water treatment
15 system installed on board that is used to comply with this division
16 shall maintain on board the vessel, in written or electronic form,
17 records, including, but not limited to, all of the following
18 information:

19 (1) Copies of all reports and forms described in subdivision (g),
20 submitted to the commission.

21 (2) Material safety data sheets for all chemicals utilized in
22 conjunction with the ballast water treatment system.

23 (3) System manufacturer's technical guides and publications.

24 (4) Documentation that the ballast water treatment system meets
25 all applicable federal, state, local, and tribal environmental
26 regulations.

27 (5) A ballast water treatment system performance log, including,
28 at a minimum, all of the following information:

29 (A) The date, time, and location of the starting and stopping of
30 the system for the purpose of treating ballast water.

31 (B) System malfunctions or unexpected situations, including
32 problem resolution.

33 (C) Both scheduled and unscheduled maintenance of the system.

34 (D) All relevant measures of performance recorded during
35 system operation.

36 (E) Any additional information required by the commission by
37 rule or regulation.

38 SEC. 3. No reimbursement is required by this act pursuant to
39 Section 6 of Article XIII B of the California Constitution because
40 the only costs that may be incurred by a local agency or school

1 district will be incurred because this act creates a new crime or
2 infraction, eliminates a crime or infraction, or changes the penalty
3 for a crime or infraction, within the meaning of Section 17556 of
4 the Government Code, or changes the definition of a crime within
5 the meaning of Section 6 of Article XIII B of the California
6 Constitution.

O
